ISA Transactions® Volume 45 Number 4, October 2006, pages 627–629

Cumulative contents of Volume 45

Volume 45, Number 1, January 2005

1 **An object-based coding scheme for frontal surface of defective fluted ingot**
Anirban Mukherjee, Subhasis Chaudhuri, Pranab K. Dutta, Siddhartha Sen, Amit Patra

9 **SISO extended predictive control—formulation and the basic algorithm**
M. Abu-Ayyad, R. Dubay, G. C. Kember

21 **Development of characteristic equations and robust stability analysis for SISO move suppressed and shifted DMC**
R. Dubay, G. Kember, C. V. Lakshminarayan, B. Pramujati

35 **A simple method to find a robust output feedback controller by random search approach**
R. Toscano

45 **Direct descent curvature optimal control with a modification algorithm and its application to nonlinear process**
Yasar Becerikli, Ahmet Ferit Konar

55 **Loop shaping design for tracking performance in machine axes**
Dale E. Schinstock, Zhouhong Wei, Tao Yang

67 **Mobile phone based SCADA for industrial automation**
Engin Ozdemir, Mevlut Karacor

77 **Robust and nominal stability conditions for a simplified model predictive controller**
Jonathan R. Webber, Yash P. Gupta

87 **A hybrid feedback linearizing-Kalman filtering control algorithm for a distillation column**
Amiya Kumar Jana, Amar Nath Samanta

99 **Sliding mode control of a simulated MEMS gyroscope**
C. Batur, T. Sreeramreddy, Q. Khasawneh

109 **Sliding mode control with PID sliding surface and experimental application to an electromechanical plant**
Ilyas Eker

119 **Stability maps for PID control of multiple lag processes**
Stephen R. Wilton

127 **Safety improvement issues for mission aborts of future space transportation systems**
M. Mayrhofer, M. Wächter, G. Sachs

Volume 45, Number 2, April 2006

141 **Fault classification on vibration data with wavelet based feature selection scheme**
Gary G. Yen, Wen Fung Leong

153 **An online novel adaptive filter for denoising time series measurements**
Andrew J. Willis

159 **Modeling, Identification, and Validation of Models for Predictive Ammonia Control in a Wastewater Treatment Plant—A Case Study**
Aljaž Stare, Nadja Hvala, Darko Vrečko

175 **Adaptive predictive functional control of a class of nonlinear systems**
Bin Zhang, Weidong Zhang

185 **Limitations of a PI controller for a first-order nonlinear process with dead time**
R. Anandanatarajan, M. Chidambaram, T. Jayasingh

201 **Stochastic dynamic output feedback stabilization of uncertain stochastic state-delayed systems**
H. R. Karimi, P. Jabehdar Maralani, B. Moshiri

215 **Large gap control in electromagnetic levitation**
Subrata Banerjee, Dinkar Prasad, Jayanta Pal

225 **Intelligent adaptive nonlinear flight control for a high performance aircraft with neural networks**
Aydogan Savran, Ramazan Tasaltin, Yasar Becerikli

249 **Computer control of a powered two degree freedom reciprocating gait orthosis**
Bashir M. Y. Nouri, Arafat Zaidan

259 **Some practical aspects of designing a laboratory scale batch polymerization reactor without gas entrapment and interfaced with virtual instrumentation**
Shrikant A. Bhat, Deoki N. Saraf, Sanjay Gupta, Santosh K. Gupta

271 **Considerations for multivariable control of the twin-roller strip caster**
Alberto Cavazos

295 **Analysis of the use of industrial control systems in simulators: State of the art and basic guidelines**
Juan A. Carrasco, Sebastián Dormido

Volume 45, Number 3, July 2006

313 **New device and method for measuring thermal conductivity of thin-films**
Chelakara S. Subramanian, Tahani Amer, Billy T. UpChurch, David W. Alderfer, Cecil Burkett, Bradley Sealey

319 **Development of a virtual linearizer for correcting transducer static nonlinearity**
Amar Partap Singh, Tara Singh Kamal, Shakti Kumar

329 **Active vibration suppression in a suspended Fabry-Pérot cavity**
Enrico Canuto

347 **Wireless industrial sensor networks: Framework for QoS assessment and QoS management**
Ivan Howitt, Wayne W. Manges, Phani Teja Kuruganti, Glenn Allgood, José A. Gutierrez, James M. Conrad

361 **Nominal and robust stability regions of optimization-based PID controllers**
Linlin Ou, Weidong Zhang, Danying Gu

373 **SISO extended predictive control: Implementation and robust stability analysis**
M. Abu-Ayyad, R. Dubay, G. Kember

393 **Predictive directional compensator for systems with input constraints**
Mohammad Haeri, Nima Aalam

407 **Time-scaling of trajectories for point-to-point robotic tasks**
Javier Moreno-Valenzuela

419 **Intelligent compensation of friction, ripple, and hysteresis via a regulated chatter**
S. Zhao, A. S. Putra, K. K. Tan, S. K. Panda, T. H. Lee

435 **Tracking control of cascade systems based on passivity: The nonadaptive and adaptive cases**
Juan C. Travieso-Torres, Manuel A. Duarte-Mermoud, Jorge L. Estrada

447 **Analysis of control interval for foundation fieldbus-based control systems**
Yanbin Pang, Shuang-Hua Yang, Hirokazu Nishitani

Volume 45, Number 4, October 2006

459 **Monitoring metal-fill in a lost foam casting process**
Mohamed Abdelrahman, Jeanison Pradeep Arulanantham, Ralph Dinwiddie, Graham Walford, Fred Vondra

477 **Identification of statistical patterns in complex systems via symbolic time series analysis**
Shalabh Gupta, Amol Khatkhate, Asok Ray, Eric Keller

491 **Design of H_∞ robust fault detection filter for linear uncertain time-delay systems**
Leishi Bai, Zuohua Tian, Songjiao Shi

503 **A simplified type-2 fuzzy logic controller for real-time control**
Dongrui Wu, Woei Wan Tan

517 **Frequency response adaptation of PI controllers based on recursive least-squares process identification**
K. Natarajan, A. F. Gilbert, B. Patel, R. Siddha

529 **Design of PI controllers for achieving time and frequency domain specifications simultaneously**
Serdar Ethem Hamamci, Nusret Tan

545 **MIMO extended predictive control—implementation and robust stability analysis**
M. Abu-Ayyad, R. Dubay

563 **Risk aversion predictive control**
G. C. Kember, S. E. Mansour, R. Dubay

575 **Nonlinear control of a multicomponent distillation process coupled with a binary distillation model as an EKF predictor**
Amiya Kumar Jana, Saibal Ganguly, Amar Nath Samanta

589 **Nonlinear predictive control of a drying process using genetic algorithms**
Ugur Yuzgec, Yaşar Becerikli, Mustafa Turker

603 **Sensor fault diagnosis based on energy balance evaluation: Application to a metal processing**
D. Theilliol, H. Noura, D. Sauter, F. Hamelin

611 **Minimizing costs while meeting safety requirements: Modeling deterministic (imperfect) staggered tests using standard Markov models for SIL calculations**
Jan L. Rouvroye, Jan A. M. Wiegerinck

623 **Author Index to Volume 45**

627 **Cumulative contents to Volume 45**
